

# Project #2 - Genetic Program

## Evolutionary Computation

Spring 2014

Due March 23rd

This is the final part of Project 2. For this project you need to present a summary of your GP program and the results. Here is a template for the summary in [Word](#) and [pdf](#) (and the [latex](#)). Note that for this project you do not need to do a lot of writing. An abstract, fill in the table summarizing your algorithms, two graphs, and a conclusion/discussion.

To test your GP algorithm use the data in [this](#) file.
