CS445 Introduction to Compilers

Assignment 3B
(Symbol Table and Type Checking)
DUE: Sat Nov 2 at 5 PM PST

300 points

This is a repeat of assignment 3 this time. I want everyone to catch up. Here is how it will work. Everyone has a chance to make up some points up to a maximum determined by how many points you got previously. You are rewarded for having done well the first time.

- If you got 350 points you get the chance to increase your score to 400.
- If you got 0 points you get the chance to increase your score to 300.
- If you got 70 points you get the chance to increase your score to 310.
- If you got x points you get the chance to increase your score to $x/7+300$.

There is a new set of tests out there for this assignment.

I will continue with the error and codegen assignments on schedule, but you need to get this part working in order to succeed.

Remember, ask questions. Drop by my office. Check out my office hours. Make an appointment. Send email questions.

Good luck.
